Note: The seventh digit of the repair wire part number (000 979 ?xx) indicates the wire size included. 0 = 0.5mm (20AWG), 1 = 1.0mm (18AWG), 2 = 2.5mm (14AWG), 3 = 4mm (12AWG), 4 = 6.0mm (10AWG)

All repair wires listed include 600mm long wire with a wire terminal on each end.

All "pins only" part numbers shown are for use with 1.0mm (18AWG) wire. Pins are also available for use with other wire sizes.

Many repair wires may be ordered with a part number suffix of "A" to indicate gold plated contacts.

**Pins and wires are for use in Audi housings only and will not work in most PNP harness male housing ends.**
